## Part 3 — Navigation System, Permissions & Information Rules

---

### Navigation System

The application uses three navigation layers.

```
Global Navigation
  ↓
Module Navigation
  ↓
Context Navigation
```

---

### Global Navigation

Visible after authentication.

```
Dashboard
Market
Portfolio
AI Coach
Learning
Competitions
Leaderboard
Profile
Settings
```

Purpose:

- Access all primary modules.

- Maintain consistent navigation.
  - Remain available throughout the application.
- 

## Module Navigation

Every module contains its own secondary navigation.

### Market

Search

Trending

Top Gainers

Top Losers

Categories

Watchlist

---

### Portfolio

Overview

Holdings

Performance

History

Risk Analysis

AI Review

---

### Learning

Courses

Lessons

Quizzes

---

Certificates

Progress

---

## Profile

Overview

Achievements

Statistics

Activity

Preferences

---

## Context Navigation

Context navigation changes according to the current page.

## Permission Architecture

### Guest

#### Permissions

- View Landing
- View Features
- Login
- Signup

#### Cannot

- Trade
- View Portfolio
- Use AI Coach
- Join Competitions

---

### Registered User

#### Permissions

- Dashboard
  - Market
  - Portfolio
  - AI Coach
  - Learning
  - Leaderboard
  - Competitions
  - Watchlist
  - Profile
  - Settings
-

## Administrator

Permissions

Everything available to registered users plus:

- User Management
- Competition Management
- Learning Management
- Reports
- Analytics
- AI Monitoring
- System Configuration

---

## Content Relationships

---

## Search Architecture

Global Search supports:

- Stocks
- Companies
- Learning Content

- Competitions

Future Support:

- AI Search
  - Help Articles
- 

## Notification Architecture

Notification Categories

- Trade Updates
- Portfolio Updates
- Competition Updates
- Learning Reminders
- AI Insights
- System Alerts

Each notification should link directly to its related screen.

---

## Error Architecture

Every error page must provide:

- Error description
- Recovery action
- Return navigation
- Retry option

Examples

- 404
  - 403
  - 500
  - Network Error
  - Session Expired
- 

## Empty State Architecture

Every empty screen must contain:

- Illustration
- Explanation
- Primary CTA
- Secondary CTA (Optional)

## Examples

- Empty Portfolio
  - Empty Watchlist
  - No Competitions
  - No Notifications
- 

# Responsive Information Hierarchy

## Desktop

- Sidebar Navigation
  - Multi-column Layout
  - Expanded Analytics
- 

## Tablet

- Collapsible Sidebar
  - Two-column Layout
- 

## Mobile

- Bottom Navigation
  - Single-column Layout
  - Floating Action Button for primary actions
- 

# Information Architecture Principles

- One clear purpose per page.
  - Consistent naming across all modules.
  - No duplicate navigation paths.
  - Related information remains grouped.
  - Primary actions should always be visible.
  - Minimize user navigation effort.
- 

# Validation Checklist

Before approving the Information Architecture:

- Page hierarchy is complete.
- Navigation is consistent.

- User permissions are defined.
  - URL structure is scalable.
  - Module relationships are documented.
  - Responsive hierarchy is established.
  - Error and empty states are covered.
-
