

MASTER_CONTEXT.md

Part 10 — Project Operating System (AOS)

Document Purpose

This document serves as the final operating system for Aetheris Trade.

It defines how every future decision regarding product, design, engineering, AI, and business should be made.

This document has the highest authority after the Project Constitution.

Project Identity

Project Name

Aetheris Trade

Category

- AI-Powered Paper Trading Platform
- Financial Education Platform

Primary Goal

Teach investing through realistic market simulation without financial risk.

Vision Statement

Build the world's most trusted AI-powered financial learning ecosystem.

Mission Statement

Empower students and beginner investors with practical investing experience, AI guidance, and structured education.

Core Principles

Every decision must improve at least one of the following:

- Education
 - User Experience
 - Simplicity
 - Performance
 - Security
 - Scalability
 - Accessibility
-

Decision Framework

Before implementing anything, ask:

1. Does it align with the Product Vision?
2. Does it improve learning?
3. Does it improve UX?
4. Is it maintainable?
5. Is it scalable?
6. Is it secure?
7. Does it follow the Design System?
8. Does it follow Engineering Standards?

If any critical answer is **No**, redesign the solution.

Project Hierarchy

MASTER_CONTEXT

Project Vision

↓

Product Requirements

↓

Engineering Standards

↓

Design System

↓

Database Architecture

↓

API Architecture

↓

Implementation

AI Working Order

Every AI must execute work in this sequence:

Read MASTER_CONTEXT

↓

Understand Requirement

↓

Review Architecture

↓

Generate Solution

↓

Self Validate

↓

Testing

↓

Development Rules

Always

- Build modular features
- Write reusable components
- Maintain documentation
- Follow project standards
- Optimize performance
- Validate inputs
- Protect user data

Never

- Introduce undocumented features
 - Duplicate business logic
 - Ignore accessibility
 - Ignore security
 - Break architecture consistency
-

Release Checklist

Every production release requires:

- Feature Complete
 - QA Approved
 - Documentation Updated
 - Performance Verified
 - Security Verified
 - Accessibility Verified
 - Production Build Successful
-

Documentation Rules

Whenever any of the following changes:

- UI
- UX
- Database
- API
- Business Logic

- Architecture

The corresponding documentation must also be updated.

Documentation is part of development.

AI Collaboration Summary

AI Tool	Primary Responsibility
ChatGPT	Product, Documentation, Planning
Claude	Full-Stack Development
Stitch	UI/UX Design
Cursor	Editing & Refactoring
GitHub Copilot	Code Completion

Success Definition

Aetheris Trade is successful when:

- Users learn investing with confidence.
 - The platform remains simple despite growth.
 - AI improves understanding rather than replacing judgment.
 - The architecture scales without major redesign.
 - Every release improves quality.
-

Long-Term Commitment

Aetheris Trade will always remain:

- Education First
 - AI Assisted
 - User Focused
 - Secure
 - Scalable
 - Maintainable
 - Premium
-

MASTER_CONTEXT Summary

This document combines the knowledge of:

- Project Vision
- PRD
- Feature Roadmap
- Product Principles
- User Personas
- User Flows
- Information Architecture
- Design System
- Database Architecture
- API Architecture
- Engineering Standards
- Project Constitution

It is the **single source of truth** for all future development.

Final Rule

If any implementation conflicts with **MASTER_CONTEXT**, **Project Constitution**, or **Engineering Standards**, the implementation must be rejected and redesigned.

Approval Status

Version: **1.0.0**

Status: **Approved**

END OF MASTER_CONTEXT

Documentation Phase: **COMPLETE** 

Next Phase: Implementation
