Part 4 — Design Language & UI/UX Operating System

Document Purpose

This document defines the complete visual language and user experience principles of Aetheris Trade.

Every screen, animation, component, interaction, and layout must follow this document.

Brand Personality

Aetheris Trade should feel:

- Premium
 - Intelligent
 - Trustworthy
 - Calm
 - Modern
 - Minimal
 - Professional
-

Emotional Experience

Users should feel:

- Confident
- Focused
- In Control
- Curious
- Motivated
- Safe

The interface must never feel:

- Overwhelming
 - Cheap
 - Noisy
 - Cluttered
-

Visual Philosophy

Design Principles

- Minimal First
 - Content First
 - Data First
 - Motion with Purpose
 - Premium over Decorative
-

UI Style

Primary Style

- Modern Glassmorphism
 - Soft Shadows
 - Layered Depth
 - Premium Dark Theme
 - Clean White Space
 - Rounded Components
-

Color Philosophy

Primary

- Deep Navy
- Electric Blue

Secondary

- Emerald Green
- Amber
- Soft Red

Neutral

- White
- Gray Scale
- Charcoal

Rules

- No random colors
 - Use semantic colors only
 - Maintain WCAG accessibility
-

Typography Philosophy

Primary Font

- Inter

Fallback

- System Sans

Rules

- Maximum readability
 - Clear hierarchy
 - Consistent spacing
 - No decorative fonts
-

Spacing System

Use an 8px spacing system.

8
16
24
32
40
48
64
80
96

Grid System

Desktop

- 12 Columns

Tablet

- 8 Columns

Mobile

- 4 Columns
-

Border Radius

Small

8px

Medium

12px

Large

20px

Cards

24px

Shadows

Style

- Soft
- Layered
- Natural

Avoid

- Hard shadows
- High opacity

Glassmorphism Rules

Cards

- Light Blur
- Transparent Background
- Thin Border
- Soft Shadow

Never

- Excessive blur
 - Low readability
-

3D Design Rules

3D elements should:

- Support storytelling
- Improve immersion
- Never distract from content

Allowed

- Hero Scene
- Floating Objects
- Background Elements

Not Allowed

- Full-page 3D overload
 - Distracting animations
-

Motion Philosophy

Animations must:

- Guide attention
- Explain transitions
- Feel natural

Never animate for decoration alone.

Animation Standards

Duration

150ms
250ms
400ms

Easing

ease-out

FPS Target

60 FPS

Scroll Experience

Use

- Smooth scrolling
- Scroll storytelling
- Progressive reveal

Avoid

- Scroll hijacking
- Excessive parallax

Component Language

Every component must be:

- Consistent
- Reusable
- Accessible
- Responsive

Card System

Cards should include:

- Clear hierarchy
 - Soft elevation
 - Consistent padding
 - Rounded corners
-

Dashboard Philosophy

Dashboard should prioritize:

- Portfolio
- Market
- AI Insights
- Learning Progress
- Quick Actions

Information density should remain balanced.

Charts

Charts must be:

- Interactive
- Responsive
- High contrast
- Easy to read

Avoid unnecessary visual effects.

Iconography

Style

- Minimal
 - Outline
 - Consistent stroke width
-

Illustration Rules

Illustrations should:

- Support learning
 - Match brand identity
 - Avoid visual clutter
-

Responsive Design

Every screen must support:

- Mobile
- Tablet
- Desktop
- Ultra-wide Displays

Mobile-first implementation.

Accessibility

Requirements

- Keyboard Navigation
 - Screen Reader Support
 - Color Contrast Compliance
 - Focus Indicators
-

UX Principles

Every interaction should be:

- Predictable
 - Fast
 - Intuitive
 - Consistent
 - Recoverable
-

Micro Interactions

Include

- Hover Feedback
 - Button States
 - Loading States
 - Success Feedback
 - Error Feedback
-

Premium Experience Rules

Every screen should communicate:

- Trust
 - Performance
 - Precision
 - Simplicity
-

Never Allowed

- Cluttered layouts
 - Random animations
 - Inconsistent spacing
 - Inconsistent colors
 - Multiple design styles
 - Poor accessibility
 - Slow interactions
-

AI Design Instructions

Every AI generating UI must:

- Follow the Design System.
 - Preserve visual consistency.
 - Maintain responsiveness.
 - Prioritize usability over decoration.
 - Never introduce new design patterns without approval.
-

End of Part 4
