Part 1 — Project Identity & Foundation

Document Information

Project: Aetheris Trade
Document: MASTER_CONTEXT
Version: 1.0.0
Status: Active
Owner: Priyanshu Rajpurohit

Purpose

Primary operating manual consolidating architecture, product, engineering, design and governance decisions.

What is Aetheris Trade?

An AI-powered paper trading and financial education platform with AI guidance, paper trading, analytics, learning academy, competitions and progress tracking.

Mission

Build the world's most trusted AI-first paper trading platform.

Vision

Create the most complete AI-powered financial learning ecosystem.

Long-Term Vision

Become the benchmark platform for paper trading and financial literacy.

Core Philosophy

Teach, Guide, Simplify, Analyze, Motivate and Build Confidence.

Product Identity

AI-First, Education-First, User-Centric, Premium, Secure, Scalable and Data-Driven.

Product Goals

Make investing easy to learn, enable safe practice, encourage learning and build confidence.

Target Users

Students, beginner investors, young professionals, finance learners and educational institutions.

Problem Statement

Traditional investing platforms overwhelm beginners and lack educational guidance.

Success Definition

Users learn consistently, improve decisions and gain confidence without financial risk.

Core Values

Trust, Simplicity, Transparency, Accessibility, Education, Security, Innovation, Performance, Scalability, Maintainability.

Non-Negotiable Rules

Follow the Design System, Engineering Standards and Information Architecture. Preserve accessibility, performance, documentation and privacy.

Things Aetheris Trade Will Never Do

Guarantee profits, encourage gambling, mislead users or sacrifice security.

AI Philosophy

AI educates, explains, analyzes and highlights risks. It never guarantees outcomes.

Design Philosophy

Premium, calm, modern, immersive and trustworthy.

Engineering Philosophy

Readable, maintainable, scalable, secure and well documented.

Master Rule

If implementation conflicts with the Product Vision, Constitution, Engineering Standards or Design System, it must be redesigned.

AI Instructions

Always align outputs with project vision and approved standards.
