

12_Project_Constitution.md

Part 3 — Enforcement, Maintenance & Long-Term Governance

Definition of Done

A feature is considered complete only when:

- Functional requirements are implemented.
 - UI follows the Design System.
 - Code follows Engineering Standards.
 - Database migrations are complete.
 - APIs are documented.
 - Tests pass successfully.
 - Documentation is updated.
 - Performance targets are met.
 - Accessibility requirements are satisfied.
-

Release Approval Checklist

Before every production release:

- Feature Complete
 - QA Approved
 - Security Review Completed
 - Documentation Updated
 - Performance Validated
 - Accessibility Validated
 - Deployment Approved
-

Technical Debt Policy

Technical debt is allowed only when:

- It is documented.
- A resolution plan exists.
- It does not compromise security or stability.

Every technical debt item must include:

- Description
 - Reason
 - Impact
 - Priority
 - Planned Resolution Version
-

Refactoring Policy

Refactoring should:

- Improve readability.
- Improve maintainability.
- Preserve functionality.
- Reduce complexity.

Refactoring must not introduce breaking changes.

Dependency Management

Rules

- Prefer stable dependencies.
 - Avoid unnecessary packages.
 - Remove unused dependencies regularly.
 - Review dependency updates before adoption.
-

Documentation Maintenance

The following documents must always remain synchronized:

- Project Vision
- PRD
- Feature Roadmap
- Product Principles
- User Personas
- User Flows
- Information Architecture
- Design System
- Database Architecture
- API Architecture
- Engineering Standards
- Project Constitution
- MASTER_CONTEXT

AI Usage Policy

AI-generated work must be:

- Reviewed
- Tested
- Documented
- Verified before production

AI must never replace engineering review.

Project Ownership

Responsibilities

Product Owner

- Vision
- Roadmap
- Prioritization

Engineering

- Architecture
- Development
- Security
- Performance

Design

- User Experience
- Design System
- Accessibility

AI Assistants

- Documentation
 - Code Assistance
 - Research
 - Refactoring Support
-

Long-Term Vision

Aetheris Trade should remain:

- Modular
- Scalable
- Maintainable
- Secure
- Educational
- AI-First

Every future version must preserve these characteristics.

Amendment Process

Changes to this constitution require:

1. Proposal
 2. Review
 3. Impact Analysis
 4. Documentation Update
 5. Approval
 6. Version Increment
-

Constitution Hierarchy

If conflicts arise, higher-level documents take precedence.

Compliance Checklist

Every release must comply with:

- Project Vision
 - Product Principles
 - Engineering Standards
 - Design System
 - API Standards
 - Database Standards
 - Security Policies
 - Accessibility Policies
-

Final Statement

This Constitution serves as the governing document for Aetheris Trade.

All future product, engineering, design, and AI decisions must align with the principles and standards defined within this document.
